Subject: RE: Falcon Refinery - Irrigation Permit

Good afternoon,

I appreciate the advance notice that Lazarus will be pursuing an irrigation permit for water in Tank 12. In order for TCEQ to evaluate the proposed land application activities, please provide applicable information from the Industrial Wastewater Technical Report, which can be downloaded at

https://www.tceq.texas.gov/permitting/wastewater/industrial/TPDES_industrial_wastewater_steps.html The TCEQ requests that Lazarus submit Worksheets 3.0 and 3.1, as applicable. Instructions for completing the Industrial Wastewater Technical Report worksheets are also available at the web address provided above.

In addition, please provide a narrative summary including the following information:

1. A description of the proposed land disposal site and where it is located,
2. A description of how the water will be routed to the proposed disposal site, and
3. Which watercourse the water would flow to if it escaped the site.

Please submit these materials to me via email at Katie.Delbecq@tceq.texas.gov, or send a physical copy to the following mailing address:

Katie Delbecq MC-136

Subject: Falcon Refinery - Irrigation Permit

Katie:

I talked with Steve Wilson with Lazarus and it appears that they are wanting to pursue an irrigation permit for water in Tank 12 similar to the one attached. They have a contractor working on this and I wanted to send you this information to see if this will help once you receive the request from Lazarus.

I would appreciate it if you could provide your complete contact information to everyone. If you have any questions, please let me know.

The remaining activities at the site include the following:

1. Tank 7: Disposal of waste placed in roll-off boxes: **(Scheduled for disposal on 8/7, 8/9, 8/13, 8/15 @ US Ecology in Robstown via thermal desorption)**
2. Tank 12 (Moved from T13): Treat/dispose of oily water and remove/dispose of any accumulated tank bottoms **(Tricord is working with a third party to get this done)**
3. Refinery Piping/Equipment Evaluation/Removal: Evaluate/Remove/Dispose of waste within piping and equipment **(60% complete)**
4. Asbestos Evaluation/Removal: Evaluate/Remove/Dispose of Asbestos Containing materials **(No change)**
5. Final Report Plan: Begin preparation of final report for removal action including all information from 2003 to completion. **(No change)**
